HEALTH CHECKUP PACKAGES BY KING'S

We are passionate about empowering our patients and truly believe that prevention is better than the cure. Our specialist Family Medicine physicians take a holistic approach to ensure that you are in control of your health, keeping you on track for your health goals.

Many chronic conditions such as diabetes, high cholesterol or high blood pressure do not have early warning symptoms. Early detection through screening may help people avoid the more serious complications of these conditions such as heart attacks or strokes.

Our bespoke health screening packages have all been designed to provide a comprehensive overview of your health.

ORTHOPAEDIC DEPARTMENT

Our Orthopaedic Department is made up of doctors with fellowships in dedicated sub-specialties such as knee, hand, sports and paediatric orthopaedic surgery. The focused training in their specific field facilitates better patient care and makes King's a "one stop shop" for orthopaedics. Cross departmental referrals ensure every patient is treated by the physician with the most experience for each diagnosis.

OUR ORTHOPAEDIC TREATMENTS INCLUDE:

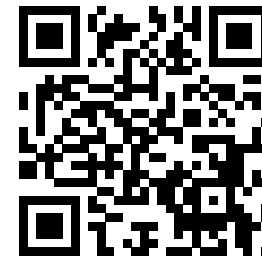

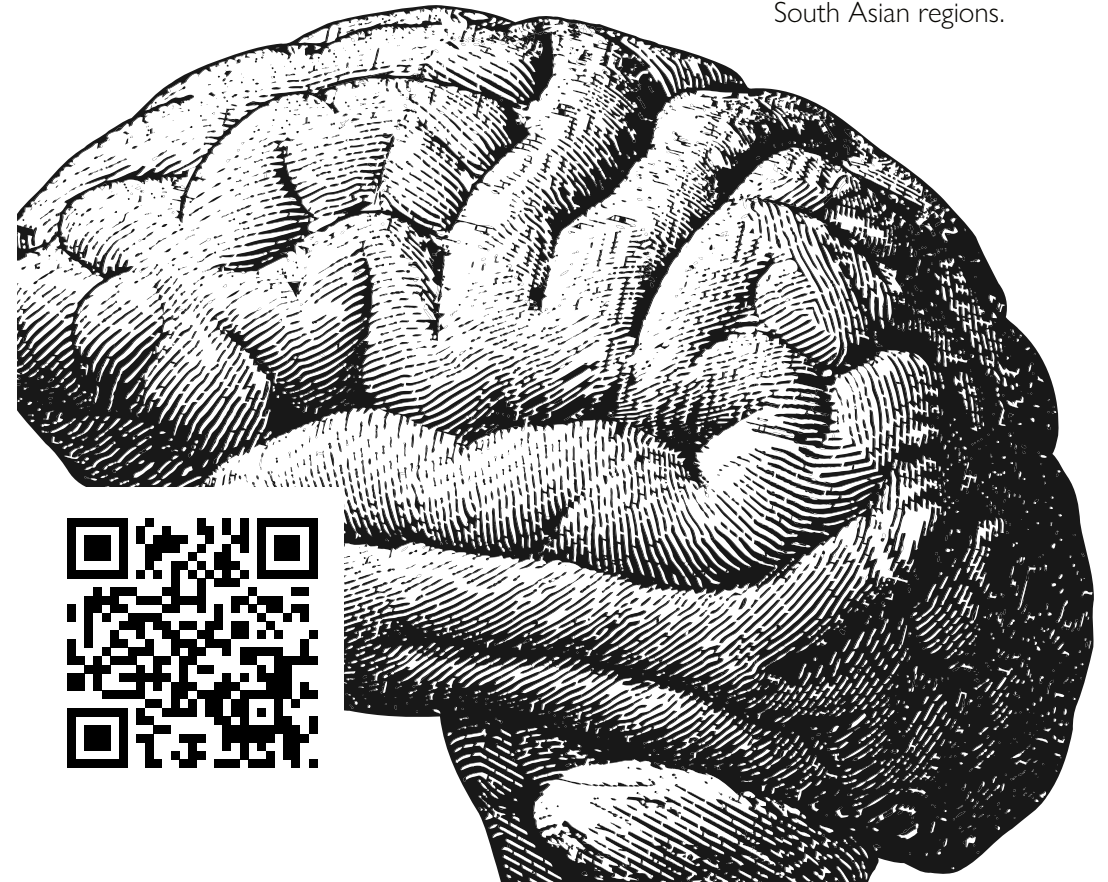

- **Hand & wrist treatments and surgery** For both adults and paediatric patients
- **Joint Replacement**
Hip joint & Knee joint replacement and revision surgery
- **Foot & Ankle injuries**
- **Sports Medicine**
Include treatment of acute knee injuries, anterior cruciate ligament (ACL) reconstruction, arthroscopic surgery
- **Paediatric orthopaedics**
Including neonatal, hip screening, treatment of club foot and other common limb problems, correction of limb deformities and limb lengthening.
- **Spine surgery for neck & back**
Including surgery for disc disease, artificial disc replacement for cervical disc disease, lumbar microdiscectomy, spinal deformity surgery (scoliosis and kyphosis) for adults and children.

NEUROSCIENCES CENTRE OF EXCELLENCE

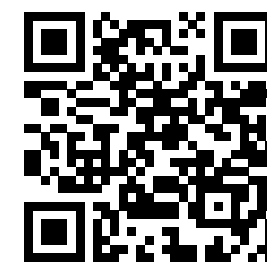

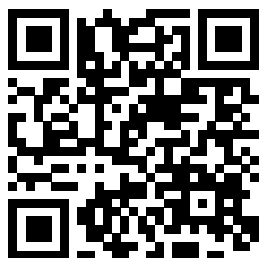

King's Neurosciences Centre offers world class high quality comprehensive care for neurological disorders that affect the brain, spinal cord, peripheral nerves and the muscle. This includes expert diagnostics, dedicated treatment and management of complex neurological disorders in a compassionate environment with state-of-the-art facilities.

The centre is led by world renowned UK & European trained highly experienced Neurologists and Interventional Neurologists and Neurosurgeons who care for patients who not only come from the Middle East region, but the wider South Asian regions.

SPINAL SURGERY

We use a range of conventional, mini-open, minimally invasive spinal surgeries, microsurgery, spinal fusion, and arthroplasty techniques, spinal neuronavigation and O-arm for 3D intraoperative image acquisition.

NEURO-SURGERY

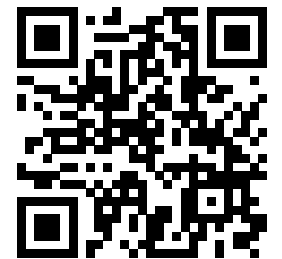

At King's Neurosurgery Unit we have a multidisciplinary team of highly trained neurosurgeons who diagnose, treat, and manage an array of neurological conditions using the latest non-invasive, minimally invasive and open procedures/ techniques in a calm and compassionate environment, where they help patients improve and regain their quality of life.

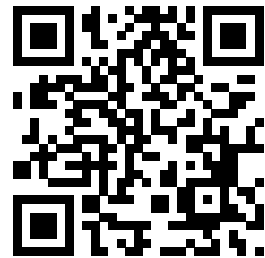

ADVANCED PARKINSON'S RESEARCH CENTRE OF EXCELLENCE

We are proud to be the first centre offering lifesaving advanced infusion therapy treatments in the Middle East region.

Our centre is made up of a multi-disciplinary team, led by advanced Parkinson's expert Dr Vinod Metta, Consultant Interventional Neurologist, part of the King's visiting Doctor Programme.

CARDIOLOGY DEPARTMENT

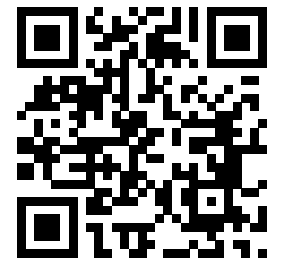

At King's, we offer a comprehensive assessment of heart related symptoms using modern and state-of-the-art tools for the diagnosis, treatment and management of cardiovascular diseases. Our highly experienced cardiologists layout a personalised management plan in agreement with you in addition to tailor-made modifications of cardiac risk factors.

CARDIOTHORACIC SURGERY

The Cardiothoracic Surgery Unit at King's College Hospital London Dubai provides comprehensive cardiothoracic critical care and recovery services, which includes diagnosing, treating and managing conditions that affect the chest organs.

The unit comes with state-of-the-art equipment, and is Led by UK trained world-class cardiothoracic surgeons surgeons with a wealth of experience in a long list of cardiothoracic surgeries and procedures.

We provide patients with the very latest treatments and work closely with our doctors in other medical specialities such as ENT, ensuring patients receive tailored care whatever their condition.

PHYSIOTHERAPY

GASTROENTEROLOGY

At King's College Hospital London, UAE, the Department of Gastroenterology and Liver Diseases is a full-fledged unit that provides patients with exceptional healthcare, following well accepted protocols established at King's College Hospital, London, UK based on the NICE guidelines (The National Institute for Health and Care Excellence). We provide comprehensive care for patients suffering from gastrointestinal, liver, pancreatic and colorectal diseases at our hospital with a team of professional physicians and surgeons who have extensive years of experience in this field.

ENDOSCOPY CENTRE OF EXCELLENCE

At King's College Hospital London, UAE, we have the most advanced endoscopic equipment to provide patients with advanced endoscopy solutions for the treatment of gastrointestinal diseases.

Apart from common endoscopic procedures for the food-pipe, stomach and colon, our experts offer the widest range of Endoscopic Ultrasound (EUS) treatments in Dubai for treating Hepato-Pancreatico-Biliary (HPB) conditions.

WEIGHT LOSS PROGRAMS

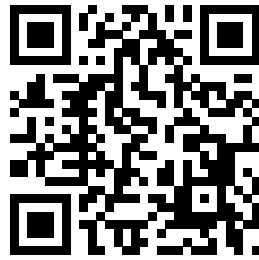

King's Weight Loss & Bariatric Programme provides a comprehensive multidisciplinary approach to obesity and diseases such as diabetes and high cholesterol. Our programme incorporates non-surgical options related to obesity, in addition to nutritional management prior to considering surgical treatment.

ENDOCRINOLOGY DEPARTMENT

At Kings' College Hospital Dubai we treat a wide range of pituitary disorders. You will have access to the latest screening services, a choice of diagnostics and treatment options, and step-by-step support throughout your treatment journey.

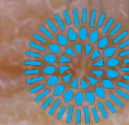

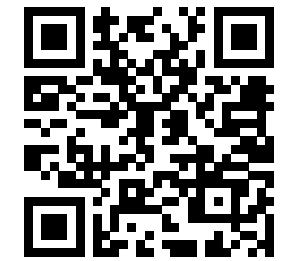

Our doctors have a wealth of experience in treating patients with many conditions. Our treatments are evidence-based, and fully integrated with King's College Hospital's facilities in the UK. We also provide educational information about your condition so that you can make informed decisions at every stage of your treatment.

ENT

Our ENT department at King's College Hospital Dubai specialises in the treatment of conditions associated with the ear, nose or throat, in addition to certain head or neck complaints in both children and adults. The approach, adopted by our leading ENT experts, towards patient care allows for the best possible outcomes while keeping the cost of that care to a minimum.

At King's we have two ENT aviation qualified specialists who maintain advanced training as Aeromedical specialists and take pride in providing first class integrated care to all Pilots & Cabin crews in the region.

**Moorfields
Eye Hospitals UAE**
A branch of Moorfields London

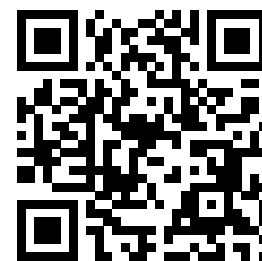

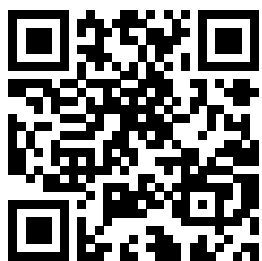

OPHTHALMOLOGY

As part of our commitment to our patients to provide a wide range of health related services in one convenient location, we are pleased to inform you that we have reached an agreement with Moorfields Eye Hospital Dubai, a fully integrated branch of Moorfields London, the oldest and most renowned eye hospitals in the world.

With over 200 years at the forefront of specialist eye care, Moorfields has accumulated a huge depth of knowledge and expertise in identifying and treating eye related diseases which otherwise impact sight and quality of life.

DERMATOLOGY

Doctors at King's College Hospital, Dubai specialise in diagnosing and treating a wide range of skin disorders, including cancer. Our multidisciplinary team includes dermatologists, plastic surgeons, oncologists and nurses who provide specialist care for complex skin cancer. We provide a comprehensive dermatology service to assess, diagnose and treat pre-malignant lesions, irregular or changing moles, warts, acne, eczema and other problems affecting the skin, hair or nails. In many cases, we can carry out diagnostic biopsies during the same appointment.

WOMEN'S HEALTH

OBSTETRICS

At King's College Hospital our obstetrics team offers a complete package of care for the expectant mother throughout their pregnancy, during the birth and after the delivery of their baby.

Our antenatal care package, run by our Obstetrics team from our Dubai Hospital and Medical Centre's, includes regular check-ups for the mother-to-be, as well as detailed ultrasound scans to monitor the growth of the baby.

GYNAECOLOGY

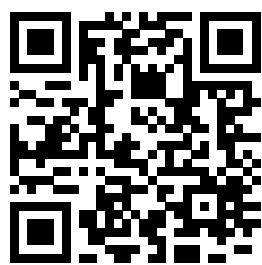

Our Gynaecology team based at our Dubai Hospital and Dubai Marina & Jumeirah clinics, offer women a comprehensive range of services ranging from preventative health checks to urogynaecological and advanced gynaecological surgery. The majority of our Doctors are European or US trained and have exceptional experience.

The Services and conditions we manage range across 7 streams.

- Women's health screenings
- Specific gynaecological disorders
- Urogynaecology
- Infections and sexual health
- Menopause
- Paediatric & adolescent gynaecology
- Advanced gynaecological surgery

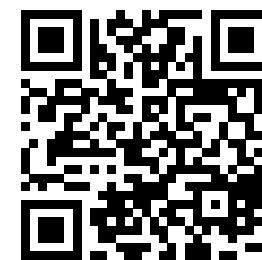

ADVANCED MATERNAL FETAL MEDICINE CLINIC

Fetal medicine focuses on the care of pregnant women (obstetrics) where there is a need to monitor the health and wellbeing of the unborn child (fetus). This includes monitoring the rate of the baby's growth, as well as diagnosing and managing fetal disorders and abnormalities using both invasive and non-invasive methods.

Women are normally referred to the unit for routine scans during pregnancy and when a routine scan has shown an abnormality in their unborn baby, or if there is any concern for the unborn baby's health. We offer specialist care, including counselling, for women who are having problems with their pregnancy, or who have had a previous pregnancy where there have been fetal abnormalities. Our doctors work closely with obstetrics and gynaecology teams at the hospital to offer a complete package of care for expectant mothers.

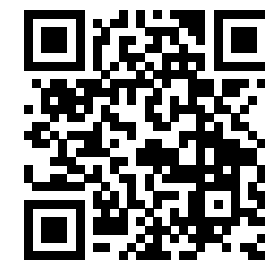

BREAST CARE CENTRE

King's Breast Care Centre offers a team of specialists with breast health screening, breast surgery, breast reconstruction and aesthetics experience. Our unique multidisciplinary approach to breast health ensures that you have access to all the breast care services you need in a single location. Our breast care team have significant track records gained in the UK and UAE.

ONE-STOP ONCOLOGY CENTRE

At King's College Hospital Dubai, we focus on offering an exemplary service. From initial consultation through to final diagnosis, treatment and beyond. Our multidisciplinary team of expert doctors and nurses, and technologists led by Dr Hassan Ghazal – an American triple board-certified Consultant Medical Oncologist and a Consultant Clinical Hematologist with more than 3 decades of clinical experience, are here to offer tailored management and treatment of your condition, and to answer any questions that you may have throughout your time with us. Whatever you need us for, we're only a phone-call away.

Aesthetics

King's College Hospital London

Aesthetics by King's College Hospital London Dubai offers a comprehensive range of cosmetic and reconstructive procedures, a wide-array of laser and skincare services, and novel aesthetic treatments to meet in-demand and complex cosmetic needs. Our highly trained and board-certified celebrity plastic, reconstructive and aesthetic specialists, and famous Aesthetic and Functional Gynecologists combine the latest evidence-based techniques and skills to achieve each patient's aesthetic desire and yield naturally customized results.

*Plastic
Reconstructive
Surgery &
Aesthetics*

Advanced Rhinoplasty Clinic

The Advanced Rhinoplasty Clinic at Aesthetics by King's is made up of a multidisciplinary team of UK board certified Plastic, Reconstructive and ENT surgeons who assess patients holistically taking into consideration both functional and aesthetic components.

The role of the clinic is to provide a gateway for patients who have had previous unsuccessful rhinoplasty, former nasal trauma, or congenital deformities of the nose.

Aesthetics & Functional Gynaecology

Post-childbirth Rehabilitation Clinic

At King's we understand that certain factors like childbirth, age, and congenital conditions can bring with them a lot of changes to a woman's body, which includes her psychological, hormonal and physiological well-being.

One of the most affected areas during pregnancy and after childbirth is the pelvic floor area and the entire intimate area. The issues faced by most women include urinary incontinence, intimate discomfort, and vaginal laxity.

With postnatal rehabilitation, these issues can be treated with both surgical and non-surgical options. These treatments are carried out after a detailed consultation with our German Board-Certified Aesthetic, Functional and Reconstructive gynaecologist, Dr Maria Karakoulaki, who comes with more than 20 years' experience in her speciality.

Female bodies experience a number of life-altering changes with age. These changes affect not only their physical appearance but also their body functionality. Menopause is an event that makes life entirely different for a woman's body. King's menopause and perimenopause clinic offers a comprehensive and holistic approach to treating menopause and perimenopause symptoms which includes Bio-identical and Body-identical Hormone Therapy, Vitamin injections, IV drips, as well as individualized supplements that contribute to the wellbeing of the woman.
