

BABY BOY CIRCUMCISION GUIDE

EVERYTHING YOU NEED TO KNOW BEFORE & AFTER

THE PROCEDURE

15 minutes procedure

Gentle local anesthetic with a fine needle for comfort

A small ring is placed over the head of the penis

Baby goes home on the same day

Very safe – <5% risk of complications like bleeding, infection, ring retention

If bleeding occurs ring is removed & small stitches will be placed to control it

KEEP IN MIND

Mild swelling in the penis → Normal

Red / Yellow / White color → Normal

Go to ED if: Fever develops

HEALING TIMELINE

RING FALLS OFF WITHIN 10 DAYS

If not, please contact the hospital for advice

Safe Procedure

Same Day Discharge

Doctor Support Available

AFTERCARE INSTRUCTIONS

Baby may be fussy (normal)

Paracetamol if needed (rare)

DAY 1

No bath

Normal handling, feeding, cuddling

Normal diaper changing

DAY 2 (Until the ring falls off)

Normal bath regularly

Warm bath + 3 spoons salt - Twice a day

Soak for 10 mins

Rinse & clean normally

Apply ointment twice a day after every bath

Normal healing process takes **6 weeks** for the final result
